SAMPLE TEST DOCUMENTS — NOT VALID

Export Ready Passport — Test Pack Guide

Five synthetic test scenarios for document extraction, evidence matching, status handling and reassessment.

Important safety and usage note

All companies, buyers, product codes, records, certificate references and dates in this pack are fictional. These PDFs are not valid commercial, legal, quality or certification documents. Do not submit them to real buyers, regulators, auditors or certification bodies.

Test case mapping

Case	Upload these PDFs	Expected behaviour
TC01 — Complete pack	TC01_01 through TC01_07	Evidence should match the buyer-defined requirements. Note: the buyer requirements list six requirements; the pack contains corresponding evidence documents.
TC02 — Revision mismatch	TC02_01 through TC02_03	Buyer requires Revision B; supplier submits Revision A. Detect MISMATCH.
TC03 — Expired certificate	TC03_01	Expiry 31 Dec 2025 is before assessment date 07 Nov 2026. Detect EXPIRED.
TC04 — Missing traceability	TC04_01 through TC04_03 only	Do not upload a traceability record. Detect MISSING; do not infer a complete traceability chain.
TC05 — Corrective action	First run TC02, then replace Rev A with TC05_01	Reassess. Revision mismatch should clear; unrelated findings must remain unchanged.

Suggested execution order

Run TC01 as the positive baseline; TC02–TC04 as negative/edge cases; then TC05 as the corrective-action and reassessment workflow. Preserve the original TC02 finding/history when uploading the corrected document.

Assessment date used in this pack: 07 November 2026. These are test fixtures, not ground-truth certification decisions.
